PROBLEMS

- ▶ Poverty and lack of job opportunities
- ▶ Low student motivation
- ▶ Low teacher motivation
- ▶ Weak link with the job market

SOLUTION: A TOKENIZED PLATFORM

We create our own cryptocurrency, the TUT token. The more you learn, the more money you get, the more relevant you are in the Community and the more visible you become to companies that may be interested in you.

HOW THE TOKEN WORKS

An ecosystem where all players get benefits: Students, Teachers and Companies. Using the Pool tokens and the Market as entry points, students and teachers may study for free and earn money through tokens, get Relevance and access to valuable services inside the dAPP.

ICO June 2018

ICO

Total Supply	1,500,000,000 TUT
For Sale	60%
