

ABOUT US

We are the leading platform in 20 countries, and from now on we'll become the leading decentralized platform worldwide.

PROBLEMS

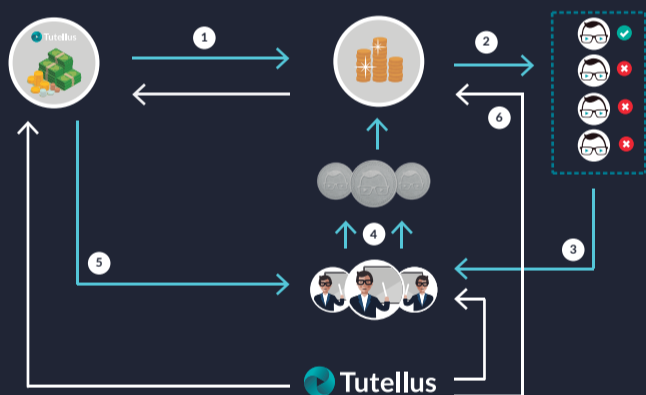

- ▶ Poverty and lack of job opportunities
- ▶ Low student motivation
- ▶ Low teacher motivation
- ▶ Weak link with the job market

SOLUTION: A TOKENIZED PLATFORM

We create 2 tokens, the STUT (internal token that measures the Relevance of the user) and the TUT (utility token whose functionality is to give subsequent access to the teacher's token, guaranteeing rights and dividends). Both tokens are integrated and help any type of user on the platform.

HOW THE TOKEN WORKS

The investors get the TUT token (1) in the ICO, and then we tokenize the teachers in the 'Teacher Tokenization Event' (2); once the best professors have been voted and selected (3), investors 'swap' their TUT tokens for the Teacher's Tokens (TTUT) (4), getting rights over their future benefits for the next 5 years (6). Tutellus finances and promotes the tokenized teachers (5).
